Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 4850127 issued to the applicant Davis. Davis discloses the same device save the shape of the rearward edge and length of the interior corner edge. At the time of the invention, one of ordinary skill in the art would have found it obvious to make the shape and dimensional changes claimed by the applicant but absent in Davis since it has been held that where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art device. In this case, Davis discloses in col. 3, lines 14-17 that the forward part of the magazine is configured for slidable insertion and selectively releasable retention of the magazine. No exact dimension were given, nor were they required since one of ordinary skill in the art would have been able to provide the required dimensions for a given ammunition size and retention spring rate.

3. Claims 4, 9 and 11-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis and established case law and in further view of U.S. 6598329

Art Unit: 3641

issued to Alexander. Davis does not disclose a gunstock having a pistol grip. However, such gunstocks are notoriously well known in the art such as disclosed by Alexander. The suggestion motivation for providing such a grip would have been to provide for engagement of a hand of a user supporting the firearm assembly (col. 4, ll. 57-63).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited on form PTO-892 are cited as of interest to show similar gunstocks.
